

STUDY PLAN IN SALAMANCA

In principle, you can choose whatever subject from any year of the faculty where you will study with the advice and approval of the academic coordinator of our university. However, it is the home university that recognises the study period and therefore they have to indicate the subjects that you should study. Any academic decision has to be approved by the exchange coordinator of your home university.

We recommend you, if possible, to send us at least three months before the beginning of your studies, together with the application form, your learning agreement elaborated by the academic coordinator of your Home University. This way, possible problems, such as overlapping timetables, ..., can be avoided.
